Does anyone remember seeing a posting several years ago about a new  
eprom for converting a Novatel cell phone to 902 mhz amateur service. I think  
it was available from an amateur club associated with Novatel or located in

the vicinity of the plant. Does anyone know how to contact Novatel or anything about this mod? Thanks in advance. George

Greetings...

I'm thinking about taking advantage of Icom's \$50 rebate on a P4AT for my wife. Does anyone have any experiences with the P series? From what I hear they never sold very well, hence the rebate and closeout.

Any info will be appreciated.
